SUMMARY

Product Designer with 9+ years of experience in e-commerce, AI-powered products and B2B SaaS. At 10Web I designed LLM-based features (AI Website Builder, Co-Pilot, Assistant), led AI e-commerce projects on WooCommerce (product pages, cart, checkout), improved onboarding and activation, and built the product design system. I own problems end to end: I work with PMs on direction, run interviews and usability tests, turn ambiguous briefs into clear flows and scalable systems, and ship production-ready UI with engineers. Most recently Product Design Lead and then Product Director at Treeme, a B2C and B2B impact platform.

EXPERIENCE

Product Design Lead → Product Director · Treeme & Soulme Aug 2025 — Jan 2026

- Eco-tech platform for tree planting in Armenia: consumer web product plus impact dashboards for organizations.
- Defined product strategy, KPIs and roadmap; led a ~10-person team (developers, QA, managers, admin) with regular one-on-ones.
- Ran the graphic and brand design process with 2 contract designers: briefs, reviews, quality and deadlines.
- Built the team's operating system: product board, sprint KPI tracker, policies, job descriptions, CRM and sales roadmap.

Product Designer · 10Web.io Mar 2022 — Dec 2024

- Designed end-to-end flows and interactions for LLM-powered features used worldwide: AI Website Builder, Co-Pilot and Assistant.
- Created the product design system in Figma (components, variants, auto-layout, shared patterns) and maintained it with frontend developers.
- Independently led AI e-commerce projects on WooCommerce and Elementor: product listing and detail pages, cart and checkout; presented them to the team.
- Redesigned onboarding and activation flows to shorten time-to-value for new customers.
- Validated designs with user interviews, usability tests and product analytics.
- Designed dashboards for hosting, CDN (Cloudflare) and domain management in agile sprints with PMs, engineers and data teams.

Freelance / Contract Product & Brand Designer 2017 — Present

- Websites, landing pages and brand identities for startups and businesses: research, wireframes, prototypes, hi-fi UI and developer handoff.
- Built lightweight design systems for client products to keep pages consistent and speed up iteration.
- Clients include MF5 (Spain/Germany: Luufen, MF5 website, Zeppelin Cat Armenia), UP2 (Germany), Qonto, Awesomic, Green Suitcase, GitUzh, honey.am, plus many logos.
- Current: web platform for SafeSlopes, a geospatial landslide-monitoring product (client: Onyx).

Head of Team Leads · Seaside Startup Summit 2018 — Present

- Grew from Team Lead to leading 30+ team leads and 500+ participants from several countries; built onboarding and collaboration processes.

SKILLS

E-commerce UX: product pages, cart, checkout · AI / LLM feature design · Onboarding & activation · B2B SaaS & dashboards · User interviews & usability testing · Data-informed iteration · Design systems · High-fidelity UI & prototyping · Visual direction & brand · Figma, FigJam · AI / LLM tools · Notion, Jira
