SUMMARY

Product designer and design lead with 9+ years of experience in B2B SaaS, AI-powered products, e-commerce, websites and brand. I take products from an unclear brief to shipped UI: research, flows, prototypes, high-fidelity design and handoff. I built the design system at 10Web and designed its AI Website Builder, Co-Pilot and Assistant. Most recently Product Design Lead and then Product Director at Treeme, where I set the product strategy and led a ~10-person team and two contract designers. Since 2018 I have also led 30+ team leads at the international Seaside Startup Summit.

EXPERIENCE

Product Design Lead → Product Director · Treeme & Soulme — Aug 2025 – Jan 2026

- Eco-tech platform for tree planting in Armenia: a consumer web product plus impact dashboards for organizations.
- Defined product strategy, KPIs and roadmap; led a ~10-person team (developers, QA, managers, admin) with regular one-on-ones.
- Ran the graphic and product design process with 2 contract designers: briefs, reviews, quality and deadlines.
- Built the team's operating system: product board, sprint KPI tracker, policies, job descriptions, CRM; planned partnerships with NGOs and government and the sales roadmap.

Product Designer · 10Web.io — Mar 2022 – Dec 2024

- Designed end-to-end flows and UI for AI-powered products used worldwide: AI Website Builder, Co-Pilot and Assistant.
- Created the product design system in Figma (components, variants, auto-layout, shared patterns) and maintained it with frontend developers.
- Independently led AI e-commerce projects on WooCommerce and Elementor (product pages, cart, checkout) and presented them to the team.
- Redesigned onboarding and activation flows to shorten time-to-value.
- Designed dashboards for hosting, CDN (Cloudflare) and domain management in agile sprints with PMs, engineers and data teams.

Freelance / Contract Product & Brand Designer — 2017 – Present

- Product interfaces, websites, landing pages and brand identities for startups and businesses: research, wireframes, prototypes, UI, handoff.
- Built design systems for client products to keep them consistent and speed up iteration.
- Clients include MF5 (Spain/Germany: Luufen, MF5 website, Zeppelin Cat Armenia), UP2 (Germany), Qonto, Awesomic, Green Suitcase, GitUzh, Gal Diamant, honey.am, plus many logos.
- Current: web platform for SafeSlopes, a geospatial landslide-monitoring product (client: Onyx).

Head of Team Leads · Seaside Startup Summit — 2018 – Present

- Grew from Team Lead to leading 30+ team leads and 500+ participants from several countries; built onboarding and collaboration processes that scale with the summit.

Director · Lermontov café-restaurant, Black Sea coast — 4 months

- Led the team of a seasonal restaurant: operations, hiring, branding and creative direction.
